

# COMMUNITY MEETING

## GRISWOLD 27N-HZ PAD

---

WELD COUNTY, COLORADO  
2023

# WELCOME

Thank you for submitting questions. We will share those questions and answers at the end of the presentation.

If you have additional questions or would like to provide feedback, please reach out to a member of our Stakeholder Relations team at [coloradostakeholder@oxy.com](mailto:coloradostakeholder@oxy.com) or at [1.866.248.9577](tel:1.866.248.9577)

Please visit us at [OxyColoradoStakeholder.com](https://OxyColoradoStakeholder.com) for additional information and resources

# AGENDA

- Introduction
- Project Overview
- Good Neighbor Commitments and Timeline

## OXY **STAKEHOLDER RELATIONS**

# DEDICATED TO THE COMMUNITY

Developed in 2014, our Stakeholder Relations team is a dedicated resource for community members

- We meet regularly with community members to seek feedback and tailor operations to the situation
- We are committed to transparency and sharing up-to-date information about our operations, including air monitoring data
- We avoid, minimize and mitigate impacts to the greatest extent possible
- We use various engagement tools: in-person and virtual meetings, mail, email, website, phone, and signs
- We learn from stakeholders. We have had over 3,500 discussions with almost 2,000 stakeholders in Colorado

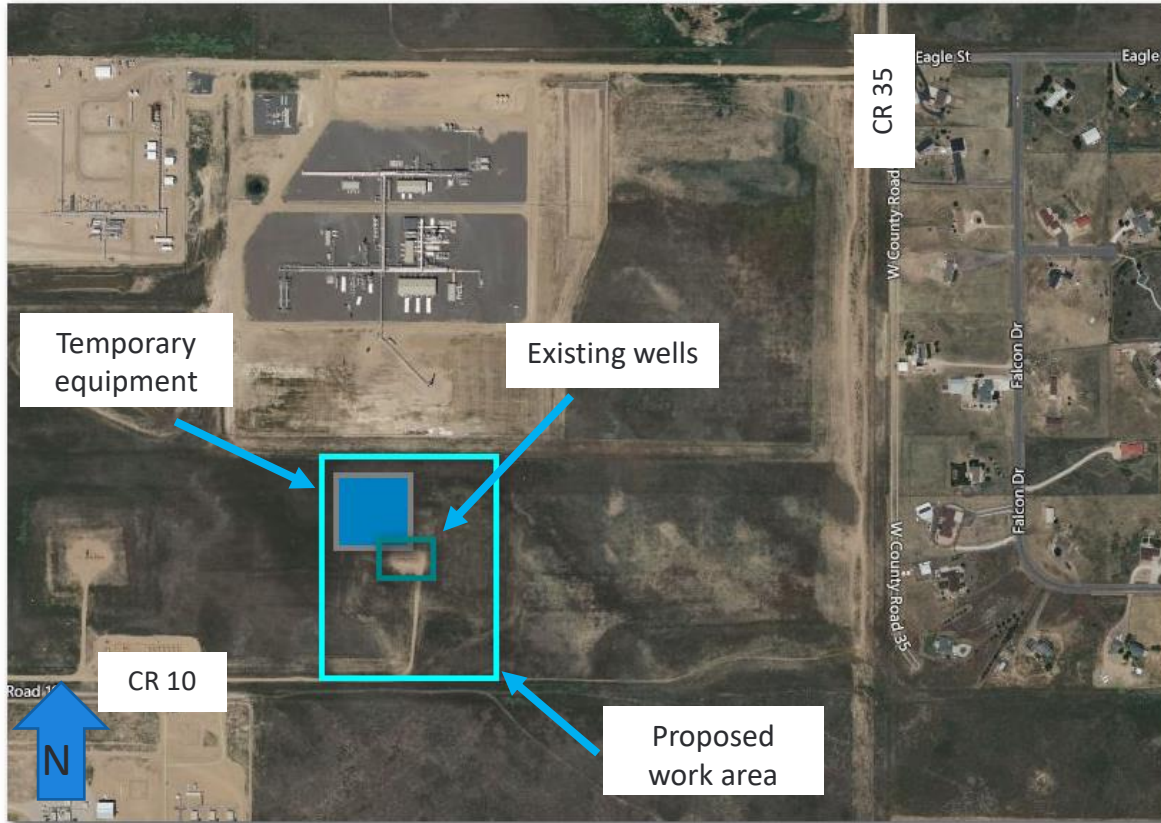

# PROJECT TEAM – PRESENTERS

The research and development of this project has been in the making for years and has included dozens of engineers, geologists, environmental, water experts and more. Below are the team members presenting and participating in the meeting today.

- Stephanie Madrid, *Stakeholder Relations*
- Russell Ehlinger, *Project Lead/Production Engineer*
- Erik Mickelson, *Environmental Lead*

# PROJECT LOCATION – OVERVIEW

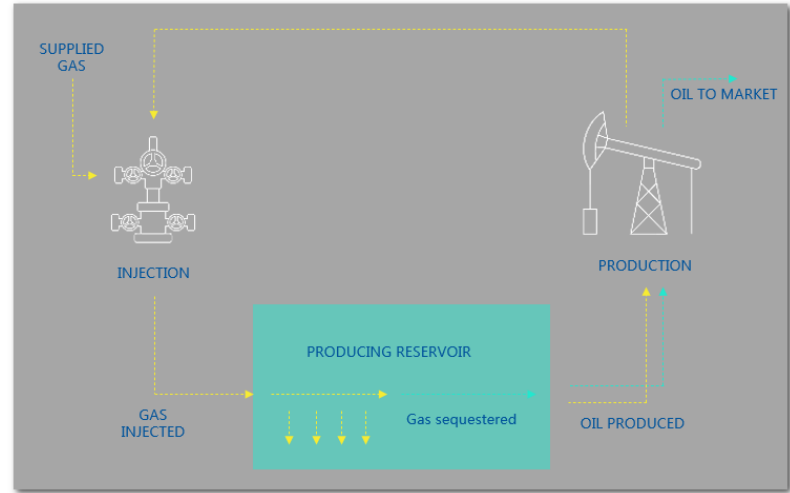

- Utilizing existing oil and gas location and wells
- Equipment needed for the proposed project is temporary
- All equipment needed will be placed on the west side of the existing well pad

## HOW DOES IT WORK?

- Existing wells, which are continuously monitored, are used to inject gas into an oil and gas reservoir
- Injected gas displaces trapped oil, allowing it to flow up through producing well

## HOW IS IT REGULATED?

- The Colorado Energy and Carbon Management Commission (ECMC) and Weld County Oil and Gas Energy Department (OGED)

# GOOD NEIGHBOR COMMITMENT – AUTOMATION AND FLOWLINES

## Automation

- Our well sites and facilities are monitored 24 hours a day, 7 days a week by our Integrated Operations Center (IOC). This also reduces traffic at the well site
- From the IOC, personnel can turn wells and equipment on and off and verify pressures and temperatures

## Flowlines

- We will test the flowlines regularly
- All flowlines are registered and mapped with the ECMC

# GOOD NEIGHBOR COMMITMENT

## Monitoring existing wells

- The integrity of existing wells is a top priority and is highly regulated through the Colorado Energy and Carbon Management Commission
  - **Rule 419** Monthly monitoring and annual testing
  - **Rule 803.g10** Evaluation of offset wells construction and set-up
  - **Rule 803.f.2** Ensure injection stays in zone

## Sampling

- Oxy has collected extensive data on water wells in northern Colorado
- Oxy will continue third party water well sampling and testing
- Testing will meet standards in **Rule 615**

# OUR ONGOING COMMITMENT TO YOU

## Notifications to be mailed

- Pad construction
- Major project milestones

## Updates posted to the website

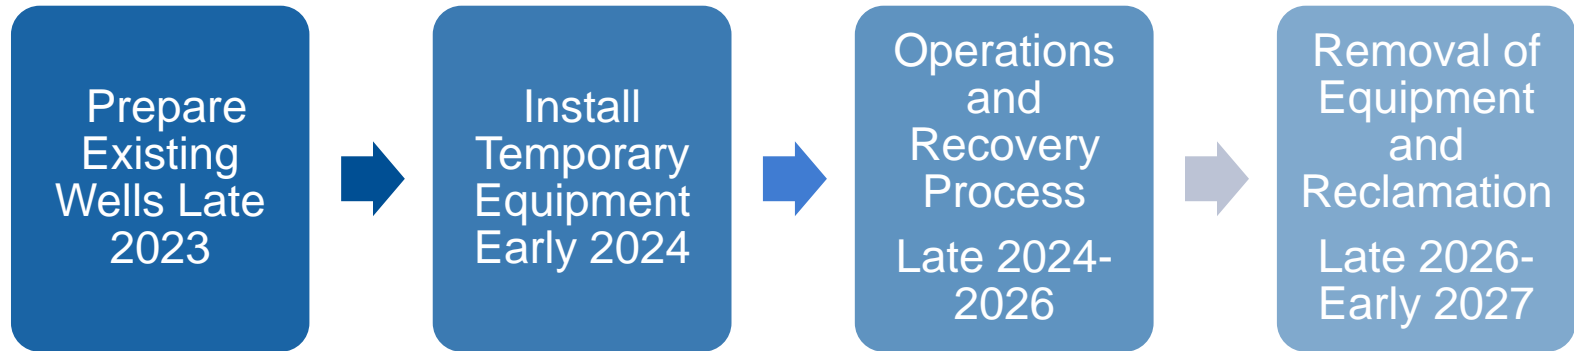

- Community meeting slide deck
- Mailed notices
- Project progress updates

## In-person or virtual meetings

- Your feedback is important to us and we look forward to continuing to work together

# ESTIMATED TIMELINE

# Q&A

- Please submit your questions using the Q&A button
- We will send you a survey via email and welcome your feedback and questions

# THANK YOU!
