OXY **STAKEHOLDER RELATIONS**

KERR MCGEE OIL & GAS ONSHORE LP (KMOG)

Colorado Operations

- KMOG, a subsidiary of Oxy USA Inc., is one of the largest producers of oil and natural gas in Colorado.
- In the past five years, we have drilled over 1,000 horizontal wells and plugged over 2,540 wells.
- Our employees live in more than 80 communities along Colorado's Front Range.

Zero Routine Flaring

- We have achieved zero routine flaring in our Colorado operations.
- Zero Flaring is just a small part of the company's global commitment to reduce GHG emissions in our operations and more efficiently use valuable methane resources.

Good Neighbor Commitment

- As we develop new wells and maintain our current wells in your community, our highest priority is to conduct our business in a manner that protects the health, safety, and welfare of communities, our employees, and the environment. We will work with you to provide up-to-date information and mitigate impacts to the greatest extent possible.

DEDICATED TO THE COMMUNITY

Stakeholder Relations Team: A Resource Dedicated to Communities Since 2014

- We are committed to transparency and sharing information about our operations.
- We minimize and mitigate impacts to the greatest extent possible.
- We use various engagement tools: in-person and virtual meetings, mail, email, website, phone, and signs.
- We have had over 5,000 discussions with over 3,000 stakeholders.

Oxy seeks feedback and continues to learn from communities like yours to tailor our operations. We look forward to hearing from you!

HICKORY 10-34HZ PAD LOCATION & OVERVIEW

Project Summary

- 12 Horizontal Wells – Drilling North
- Total Disturbance Area: 12.38 acres
- Post-Interim Reclamation: 4.93 acres
- Estimated Project Construction Start – Fall 2024

<u>Work Activity</u>	<u>Estimated Start</u>	<u>Estimated End</u>
Pad Construction	09/2024	10/2024
Surface Casing	11/2024	11/2024
Horizontal Drilling	12/2024	02/2025
Well Completions	04/2025	08/2025
Production Facility Construction	02/2025	05/2025
Interim Reclamation*	11/2025	08/2026

GOOD NEIGHBOR COMMITMENT – OIL-TANKLESS FACILITY

[Tankless Design - YouTube](#)

HICKORY 10-34HZ HAUL ROUTE AND BMPS

Oil - Tankless Facilities: Eliminates oil storage tanks and the associated emissions and truck trips associated with trucking oil. This system eliminates 80% of post-production traffic.

Water on Demand System: We use pipelines to transport water during the completions phase. At this location, we estimate that we will eliminate 116,400 truck trips.

Tracking control: Access roads will receive maintenance as needed throughout development.

Dust: When appropriate, we will proactively deploy water along the access road and well pad/facility during pre-production operations.

Speed limits: 10 mph speed limit on lease road and 5 mph once vehicles reach the location.

GOOD NEIGHBOR COMMITMENT – AUTOMATION AND FLOWLINES

Automation

- Our well sites and facilities are monitored 24 hours a day, 7 days a week by our Integrated Operations Center (IOC). This also reduces traffic at the well site.
- From the IOC, personnel can turn wells and equipment on and off, measure tank levels, and verify pressures and temperatures.

Flowlines

- Flowlines are tested regularly.
- All flowlines are registered and mapped with the COGCC.

GOOD NEIGHBOR COMMITMENT – AIR, LIGHT, ODOR AND ENVIRONMENTAL

Air

- Continuous air monitoring during drilling and completion activities.
- We use natural gas drilling engines and Tier IV diesel completions engines.
- Air monitoring summaries will be posted to our website.

Light

- LED lights strategically oriented downward and away from nearby homes.

Odor

- Odor will be managed throughout the duration of operations.

Environment

- Environmental inspections are completed prior to permitting and construction and as necessary throughout the life of the project.

Q&A AND FEEDBACK

Stakeholder Relations Team
